Storage: How should the substance be stored?									
(E.g., away from other substances, etc.)									
Storage conditions: Keep container tightly closed. Suitable packaging: as packaged Have people using the substance been provided with information / training on its use? yes									
have people using the substance been provided with mormation / training on its use? yes									
Assessment of Risk									
Are hazards to health adequately controlled with control measures in place? YES									
If NO state remedial actions to be taken:									

Emergency Procedures								
Spillages How an accidental release or spillage should be dealt with?								
Personal precautions: Refer to PPE section above. Turn leaking containers leak-side up to prevent the escape of liquid.								
First Aid What should be done if the substance is:	o not discharge into drains or rivers. Contain the spillage using bunding. Swallowed? Wash out mouth with water. If conscious, give half a litre of water to drink immediately. Consult a doctor.							
	Inhaled? Remove casualty from exposur one's own safety whilst doing s doctor.	ter.						
Chemical reactions: Is there any other substance that this substance must not come into contact with? Reactivity: Stable under recommended transport or storage conditions. Chemical stability: Stable under normal conditions. Hazardous reactions: Hazardous reactions will not occur under normal transport or storage conditions. Clean-up procedures: Transfer to a suitable container.								
Disposal: How should the substance be disposed of (or not disposed of)? Disposal of packaging: Dispose of as normal household waste. Do not pierce or burn even when empty								
NB: The user's attention is drawn to the possible existence of regional or national regulations regarding disposal.								
Health surveillance: Do colleagues using the substance require any health surveillance?	Assessor(s) Name:	Assessor(s) s	ignature:	Date: 18/07/2024
